Art Unit: 3765

The following is an examiner's statement of reasons for allowance:

Claim 1 and its dependent claims are allowed because claim 1 specifically requires a frame holder to which embroidery frames are selectively attached, the frame holder including a holder body fixed to a carriage and a movable holder mounted to one of a plurality of positions corresponding to the respective types of the embroidery frames relative to the holder body so that the position of the movable holder is exchangeable, and a detector detecting a position of the movable holder relative to the holder body.

The patent to Durville discloses an embroidery sewing machine in which an embroidery frame has a holding device 39 having a reference cam 44 having a predetermined position relative to the embroidery frame. The reference cam is detected by a detector 45 when the embroidery frame is docked onto an embroidery module 33. Takenoya et al discloses an embroidery sewing machine in which a detector determines the number and positioning of holes on an embroidery frame supporter to identify the frame type.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.".
